Yunga

While in Ecuador, you get to know usually the potential of the blend of the different EET clones. **Yunga** is the first example of processing EET103 separately allowing for a discovery of its really distinct character; processed in fermentation wooden boxes for longer time than traditionally done, Yunga is the rollercoaster of flavours. *Dynamic and balanced*, it expresses *nectarine juicy fruitiness* as a first punch, while it further rolls out a blend of *gardenia* fragrances ending up to *grapefruit honey* and *raisin bread* sweetness.

Quality - Taste Notes

peach, raisin bread, banana pudding, mellow floral

nectarine, gardenia, cherry hints, pomelo, tobacco

1.40	76%	12%	0%	120°C
